

**The Articles of  
the Fuel-Efficient Tire Industry Alliance**

# The Articles of the Fuel-Efficient Tire Industry Alliance

Approved at the Alliance Meeting on October 22, 2021 (Document No. Huan-1100002008).  
Approved at the Alliance Meeting on November 8, 2023 (Document No. Huan-1120002174).

## Chapter 1 General Provisions

- Article 1 The name of this alliance is the *Fuel-Efficient Tire Industry Alliance* (hereinafter, Alliance), a taskforce established through the Automotive Research and Testing Center (hereinafter, ARTC) by the Energy Administration, Ministry of Economic Affairs, R.O.C. (hereinafter, Energy Administration) for the implementation of the Plan for Promoting Fuel-Efficient Vehicle Technologies (hereinafter, Plan).
- Article 2 With the underlying objective of promoting highly energy-efficient tires and by combining industrial, governmental, academic and research resources, this Alliance is established with the aim of creating a fuel-efficient tire labelling system to promote the practice of self-labelling among the members of the industry, and with the aim of driving the development of technology in the domestic tire industry and enhancing the energy efficiency in vehicle tires.
- Article 3 The task of this Alliance is to establish a regulatory and verification framework for fuel-efficient tire labelling in the country, and to encourage self-disclosure among manufacturers of fuel-efficient products based on the energy efficiency grading system, in order to guide consumers in adopting these tires as their preferred choice.

## Chapter 2 Organization

- Article 4 This Alliance shall have a president, secretariat and various working groups as its permanent office-bearers, which are unpaid voluntary positions.
- Article 5 The president and secretariat are the permanent organizational roles assumed by members of the implementation unit for this Plan and are responsible for attending to the daily affairs of the Alliance.
- Article 6 The various working groups shall be formed by members of the industry, government, academia and research units on invitation.
- Article 7 The eligibility criteria for members of this Alliance are as follows:
1. Any business for tires that comply with the CNS 3670 (passenger cars), CNS 3671 (light trucks), or CNS 3672 (trucks and buses) national standard of the Republic of China, and whose company is incorporated and registered in Taiwan according to the laws of the Republic of China, may apply to join the Alliance. The applicant is required to complete the application documents (Appendix 1 to 3) and submit them to the secretariat for review and approval.
  2. Membership of this Alliance is free of charge. The operational costs for the Alliance are covered through the expense arrangements under the Plan.
  3. Members of this Alliance are required to disclose the energy efficiency grades of their fuel-efficient tire products (Appendix 4) in accordance with the “Operational Rules for the Promotion and Use of Fuel-Efficient Tire Labelling”, and shall display the labels on the products and in their catalogs or advertising and publicity items.
  4. Any member of the Alliance who wishes to withdraw their membership shall complete the *Application Form for Change of Member's Details* (Appendix 5), which shall take immediate effect after being reviewed and approved by the secretariat. Any member who fails to comply with the *Operational Rules for the Promotion and Use of Fuel-Efficient Tire Labelling* may have its membership revoked by the Alliance, after which it shall no longer be allowed to use the fuel-efficient tire labels.

## Chapter 3 Personnel Functions

Article 8 The president is responsible for the general management and supervision of the administrative operations for tire labelling, and shall be the public representative of the Alliance and serve as the chairperson for all relevant administrative meetings of the Alliance. If the president is unable to execute such responsibilities due to other engagements, the secretariat shall be appointed to execute them on the president's behalf.

Article 9 The functions of the secretariat are as follows:

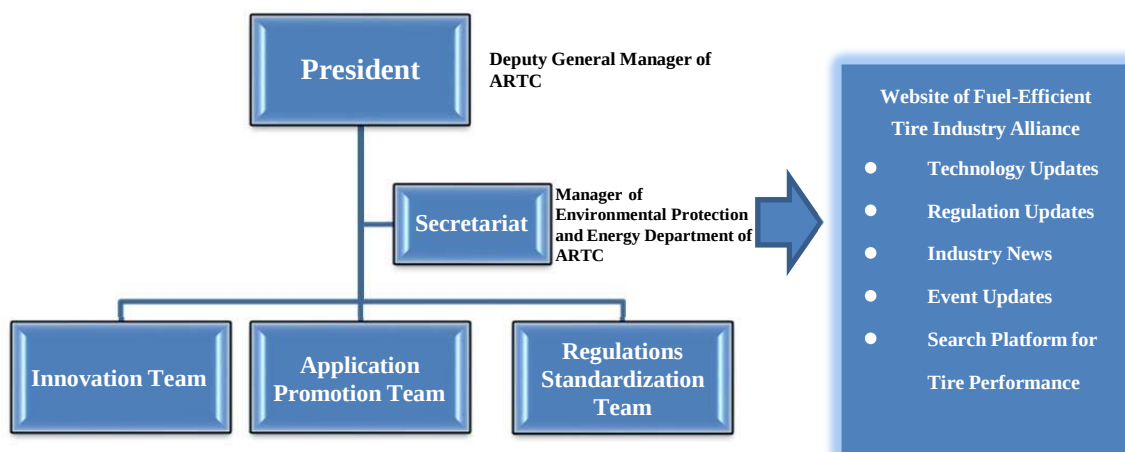

1. Formulate and amend the charter of the Alliance.
2. Act as the liaison for external parties.
3. Implement administrative and inspection tasks as well as automotive aftermarket management for tire labelling.
4. Convene technical team meetings whenever required to formulate annual goals.

Article 10 The functions of the technical team are as follows:

1. Provide new knowledge of global tire technology and regulations to promote exchange of information among members.
2. Assist the secretariat in implementing policies and achieving annual goals.

## Chapter 4 Supplementary Provisions

Article 11 The organizational structure of the Fuel-Efficient Tire Industry Alliance is as below.

Article 12 If the periodic tasks under the Plan have been completed or the existence of the Alliance is no longer justified, a resolution shall be passed to dissolve the Alliance.

Article 13 Any matter not sufficiently defined in this Charter shall be dealt with in accordance with the relevant laws and regulations.

## Appendix 1

### Letter of Intention for Joining the Fuel-Efficient Tire Industry Alliance

#### 1. Purpose of Alliance

With the objective of increasing the energy efficiency of vehicle tires in the country, the ARTC establishes the *Fuel-Efficient Tire Industry Alliance* with the aim of improving the key technical capabilities of the domestic tire industry through promoting the use of highly energy-efficient tires and combining the research competencies of the industry.

#### 2. Explanation

This letter of intention is to be signed by the head of the representative department of the company. Notifications for all subsequent meetings will be delivered according to this letter of intention.

Name of Company: \_\_\_\_\_

☐ Yes, we would like to become a member of the Fuel-Efficient Tire Industry Alliance

☐ No, we do not want to join the Alliance. Feedback: \_\_\_\_\_

Person in Charge of Company: \_\_\_\_\_ Tel.: \_\_\_\_\_

Address of the Company: \_\_\_\_\_

Representative Department of the Company: \_\_\_\_\_ Name: \_\_\_\_\_

Tel.: \_\_\_\_\_ Mobile No.: \_\_\_\_\_ E-Mail: \_\_\_\_\_

Seal:

(Seal of the Company)

(Seal of the Head of the Department)

Please mail this letter stamped with your seals to Mr. Lai of the ARTC (No. 6, Lugong South 7<sup>th</sup> Road, Lukang Town, Changhua County).

#### 3. Contact Details

1. Liaison: Mr. Lai, Secretariat of the Fuel-Efficient Tire Industry Alliance
2. Address: No. 6, Lugong South 7th Road, Lukang Town, Changhua County 505
3. Contact No.: 04-7811222#2416
4. E-mail : hydrogenlai@artc.org.tw

Date:

## Appendix 2

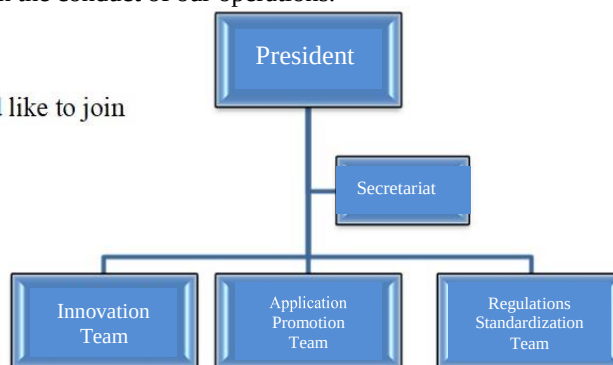

### Survey Form for the Technical Team of the Fuel-Efficient Tire Industry Alliance

We are grateful for your support to the Fuel-Efficient Tire Industry Alliance. We kindly request you to indicate your interest in joining any of the teams below to assist us in meeting your needs in the conduct of our operations.

Name of Organization: \_\_\_\_\_ would like to join

- ☐ Innovation Team of the Alliance  
☐ Application Promotion Team of the Alliance  
☐ Regulations Standardization Team of the Alliance

You may choose more than one option above.

#### Representatives for Technical Team (No Quota)

| Team                                                                                                                                                         | Members | Designation | Contact Details                                               |

## Appendix 3

### Disclosure and Consent Form for Use of Personal Data

Dear Member,

The Energy-Efficient Tire Industry Alliance (hereinafter referred to as the Alliance) requests that you read through the terms of this Consent Form in detail, in ensuring compliance with the personal data protection laws and the privacy rights policy requirements of this Alliance as well as safeguarding your rights and interests. Thank you!

1. The purpose of data collection: the management of members' register of the Fuel-Efficient Tire Industry Alliance, the notification of meetings, contact and channels of interaction with manufacturers, and the execution of relevant administrative operations.
2. The data provided by you, including the name of the company, personal name, designation, contact information (telephone number, email, fax number, and address) or any other information by which you are directly or indirectly identifiable, shall be protected by this Alliance and used for purposes within the scope of the above operations.
3. The period, location, opposite party for and manner of use of the personal data:
  - (1) This Alliance shall use your personal data in a reasonable manner during the period relating to the purpose of the data's collection.
  - (2) Except where the purpose of data collection concerns international operations or activities, this Alliance shall only use your personal data within the territory of the Republic of China.
  - (3) The personnel of this Alliance shall use your personal data in a reasonable manner within the scope of the purpose of the collection of data.
  - (4) This Alliance shall fulfill its obligation for supervision if it authorizes external agencies to handle your personal data due to operational needs.
4. You are entirely entitled to choose whether to provide your personal data to this Alliance. If you opt out of providing your personal data, this Alliance will not be able to provide services relating to the purpose of the collection of data. However, if the personal data provided by you is incorrect or it is found to be false through the reports made by others, a discovery by this Alliance or as a result of the false use or theft by others, this Alliance reserves the right to terminate your rights.
5. If you have any query regarding the exercise of your personal data rights under Article 3 of the Personal Information Protection Act, you may leave your inquiries at <http://www.artc.org.tw/tw/contact> or email them to [service@artc.org.tw](mailto:service@artc.org.tw). The Alliance will reply to you as soon as possible after receiving your message. Thank you!

**I have understood the above terms and agree to the reasonable collection, handling or use of my personal data by the Fuel-Efficient Tire Industry Alliance within the scope of the purpose for the data's collection as stated above.**

Signed by \_\_\_\_\_

## Appendix 4

### Operational Rules for the Promotion and Use of Fuel-Efficient Tire Labelling

1. The Automotive Research & Testing Center – Fuel-Efficient Tire Industry Alliance (hereinafter referred to as this Alliance) establishes these rules with the aim of promoting tire products of high fuel efficiency grades, encouraging manufacturers to produce fuel-efficient tires of fuel efficiency grade C and above, and guiding consumers in choosing these tires as their preferred choice.
2. The fuel-efficient tire labels that are referred to in these rules shall refer to the fuel-efficient tire product images registered according to law by the Automotive Research and Testing Center (hereinafter referred to as ARTC).
3. Energy-efficient tire labelling may be applied for by tire business operators for car-use tires that comply with the CNS 3670 (passenger cars), CNS 3671 (light trucks), or CNS 3672 (trucks and buses) national standard of the Republic of China.
4. Authorization for use of fuel-efficient tire labelling shall be approved and granted to manufacturers according to the tire performance benchmarks and energy efficiency grades (as outlined in Schedule 1).
5. Manufacturers applying for authorization to use fuel-efficient tire labelling on their products must ensure such products conform to the tire performance benchmarks for each grade (in Schedule 1) and submit an application to this Alliance along with the following documents:
  - (1) Photocopies of the company's registration documents issued by the company or business registration authorities, photocopies of business registration documents, or registration documents printed from the websites of the above authorities.
  - (2) Photocopies of the test reports for the fuel efficiency grade (rolling resistance coefficient) and wet grip index of the tires, with the stamp of the company's seal, or the electronic files of the test reports. The testing agency shall be a designated technical services agency approved by the member countries of the United Nations Economic Commission for Europe (1958 UNECE Agreement) or a domestically designated laboratory, wet grip testing shall be carried out in compliance with Annex 5 of ECE R117.02, CNS 15655, or CNS 15656, and rolling resistance testing shall be carried out in compliance with Annex 6 of ECE R117.02 or CNS 15388, along with any subsequent relevant amendments.
  - (3) The Declaration Form for Products Seeking Authorization for Fuel-Efficient Tire Labelling (in Schedule 2), and the product test certificates of the Bureau of Standards, Metrology and Inspection of the Ministry of Economic Affairs.
6. After a manufacturer has been approved and authorized for the use of fuel-efficient tire labelling, the ARTC will disclose the relevant product details on the website for the reference of consumers in the country. The manufacturer may download the labels for fuel-efficient tires from the website of this Alliance and stick or display them on the products or their catalogs or advertising and publicity items. The label images used must be those registered by the ARTC, where their shapes or colors cannot be changed nor new wordings added, but their sizes may be enlarged or reduced in proportion (in Drawing 1).
7. The manufacturer shall bear the tire performance testing fees for its products' application for tire-efficient tire labelling. After the authorization, the fees for any sampling tests conducted from time to time shall be borne by the relevant program under the Bureau of Energy. However, if the results of the performance sampling tests are inconsistent with the declared performance benchmarks, the manufacturer may, upon receiving written notification within the specified timeframe, request a repeat test or agree to use the sampling test results as the final determination. If the final determination after the sampling and repeat tests is inconsistent with the declared performance benchmarks, the specification of the product shall be canceled. The manufacturer may select up to a maximum of 3 additional samples for the repeat tests, and the arithmetic average of all 4 samples shall be used as the final result of determination. The fees for the repeat tests shall be borne by the manufacturer.
8. The period of use of fuel-efficient tire labels is three years. The labels shall be ineffective once the period expires. Three months before the expiration of the period of use of fuel-efficient tire labels, the manufacturer shall submit an application for renewal of use to this Alliance with basic documents of proof of the manufacturer and the products. If the results of market sampling tests during the period of use of the labels are consistent with the fuel efficiency grades in the original application, the test reports from the original application shall be used. Renewals are granted in three-year periods and may be applied for indefinitely.
9. A new declaration shall be provided in the event any of the following circumstances occur to the products for which authorization for use of fuel-efficient tire labelling is sought:
  - (1) Changes to the basic designs of the products (such as tire structure and treads).
  - (2) New tire sizes are added to the same series without changes to the basic designs of the products.
  - (3) The benchmarks for tire performance in these rules have been revised.

10. Fuel-efficient tire labelling shall not be used without authorization or transferred or sold to others.
11. Businesses authorized to use fuel-efficient tire labelling are not allowed to use it on unauthorized products or as trademarks.
12. Businesses authorized to use fuel-efficient tire labelling must comply with the requirements of the central government authorities with regard to the legality of the sale of the relevant products.
13. The ARTC shall carry out sampling tests from time to time on the products of businesses authorized to use fuel-efficient tire labelling. The business operators shall not avoid, impede or refuse such tests.
14. Businesses authorized to use fuel-efficient tire labelling shall make a report to this Alliance with relevant documents of proof if they have found any false use or theft of the labels by others.
15. If it is found that any business authorized to use fuel-efficient tire labelling is involved in any of the following actions, its right to use the labelling shall be revoked:
  - (1) Its application documents contain false information or where false documents have been provided.
  - (2) Fuel-efficient tire labels have been obtained through fraud, coercion or other improper manner.

Any business whose right has been revoked as per the above provision shall not be allowed to reapply for the use of fuel-efficient tire labelling within three years of the date of revocation.
16. If it is found that any business authorized to use fuel-efficient tire labelling is involved in any of the following actions, its right to use the labelling shall be discontinued:
  - (1) Application has been made to terminate use.
  - (2) Dissolution or suspension of business.
  - (3) Revocation or annulment by company registration or business registration authorities according to law.
  - (4) Renewal of use has not been made in accordance with Rule 8.
  - (5) Violation of Rule 10 which prohibits transfers or sales of the right to use fuel-efficient tire labelling.
  - (6) Serious violation by a business authorized to use fuel-efficient tire labelling of other relevant regulatory requirements for product safety verification.

Any business authorized to use fuel-efficient tire labelling that is found to be involved in any of the following actions shall be notified and required to make improvements within a stipulated period. If no improvements have been made within the period, its right to use the labelling shall be discontinued:

  - (1) Violation of Rule 11 in which fuel-efficient tire labels have been used on unauthorized products or for other purposes.
  - (2) Printing the labels without applying for authorization according to the rules, or non-compliance with the relevant rules for the registered images during the printing of the labels.
  - (3) Violation of Rule 13 in which the sampling tests carried out by the relevant department from time to time have been avoided, impeded or refused without cause.
  - (4) Where the final result of determination is inconsistent with the declared performance benchmarks after cumulative sampling and repeat tests conducted over two years.
  - (5) Where the ARTC – Fuel-Efficient Tire Industry Alliance has not been able to obtain the models or products of the same series designated for sampling tests.
  - (6) Where the treads, specifications and sizes, and load indices of the authorized tires have changed and no longer conform to the benchmarks for tire fuel efficiency.

Any business whose right to use the labelling has been discontinued pursuant to item 4, 5 and 6 of the first paragraph as well as the second paragraph above shall not be allowed to reapply for the use of performance tire labelling within a year of the date of the discontinuation.
17. Dispute resolution:
  - (1) Any business who has not passed the review and approval process or whose right to use the labelling has been discontinued may, within one month of receiving the notification, lodge an appeal with this Alliance by submitting documents of proof and a clear written explanation of its grounds and requests.
  - (2) This Alliance shall provide a reply to the appellant on the appeal outcome within one month of receiving the request for appeal.
  - (3) The ARTC shall pursue claims according to law against any applicant manufacturer who has violated these operational rules in its use of fuel-efficient tire labelling.
18. These rules shall take effect on the day of their announcement.

## Schedule 1: Benchmarks for Tire Performance

### Automotive Tires

| Fuel Efficiency Grade | Rolling Resistance Coefficient (RRC) (N/kN) | Wet Grip Index (G) |
|-----------------------|---------------------------------------------|--------------------|
| A                     | $RRC \leq 6.5$                              | $\geq 1.25$        |
| B                     | $6.6 \leq RRC \leq 7.7$                     |                    |
| C                     | $7.8 \leq RRC \leq 9.0$                     |                    |

### Light Truck Tires

| Fuel Efficiency Grade | Rolling Resistance Coefficient (RRC) (N/kN) | Wet Grip Index (G) |
|-----------------------|---------------------------------------------|--------------------|
| A                     | $RRC \leq 5.5$                              | $\geq 1.10$        |
| B                     | $5.6 \leq RRC \leq 6.7$                     |                    |
| C                     | $6.8 \leq RRC \leq 8.0$                     |                    |

### Truck and BUS Tires

| Fuel Efficiency Grade | Rolling Resistance Coefficient (RRC) (N/kN) | Wet Grip Index (G) |
|-----------------------|---------------------------------------------|--------------------|
| A                     | $RRC \leq 4.0$                              | $\geq 0.95$        |
| B                     | $4.1 \leq RRC \leq 5.0$                     |                    |
| C                     | $5.1 \leq RRC \leq 6.0$                     |                    |

#### Remarks:

- The RRC and wet grip index of the product shall be tested on the representative sample with the same treads, the results of which shall be applied as the substituted test results for the rest of the sample products. The principles for the representativeness approach are as follows:
  - Rolling resistance: to select the lowest load index.
  - Wet grip: to select the smallest tire width, the largest aspect ratio, and the smallest rim diameter.
- The measurement value for rolling resistance shall be calibrated against the comparative results pursuant to the benchmarks under Regulation (EU) No 1235/2011. For wet grip index (G), the value shall be adjusted as  $G = G(T) - 0.03$ . The manufacturer may include a factor of safety according to different testing equipment and site conditions.
- The rolling resistance sampling test value shall not exceed the RRC limit value for the energy efficiency grade + 0.3 N/kN. The wet grip sampling result  $G(T)$  shall not be lower than the performance benchmark.
- For any tire size not conforming to the CNS 3670、CNS 3671、CNS 3672 standard, the application must be accompanied with the documents of proof for product tests issued by the Bureau of Standards, Metrology and Inspection.

## Schedule 2: Declaration Form for Products Seeking Authorization for Fuel-Efficient Tire Labelling

Date of completion of form:

### 1. Basic details of applicant manufacturer

Name of company: \_\_\_\_\_  
 Company's address: \_\_\_\_\_  
 Person in charge: \_\_\_\_\_ Tax ID No.: \_\_\_\_\_  
 Contact person: \_\_\_\_\_ Department: \_\_\_\_\_ Designation: \_\_\_\_\_  
 Tel.: \_\_\_\_\_ Mobile No.: \_\_\_\_\_ Fax: \_\_\_\_\_  
 Email: \_\_\_\_\_

### 2. Name or trademark of production manufacturer \_\_\_\_\_

### 3. Name and address of production manufacturer

☐ Same as applicant manufacturer

Name of production manufacturer: \_\_\_\_\_

Address of production manufacturer: \_\_\_\_\_

### 4. This Application:

☐ New Application ☐ Renewal ☐ Specification Change ☐ Others: \_\_\_\_\_

### 5. Products Seeking Authorization

| Product name | Aspect ratio | Representative tire size | Series Size | Load index/speed rating | Rolling resistance coefficient (N/kN) | Wet grip index | Fuel efficiency grade |
|--------------|--------------|--------------------------|-------------|-------------------------|---------------------------------------|----------------|-----------------------|
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |
|              |              |                          |             |                         |                                       |                |                       |

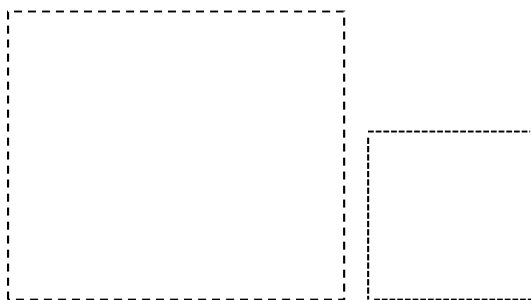

N.B. 1: This form may be replicated if space is insufficient.

N.B. 2: For any tire size not conforming to the CNS 3670、CNS 3671、CNS 3672 standard, the application must be accompanied with the documents of proof for product tests issued by the Bureau of Standards, Metrology and Inspection.

#### **4. Declaration and confirmation**

We hereby provide confirmation to the Fuel-Efficient Tire Industry Alliance that all information of the products for which authorization is sought in this application is true. The manufacturer shall be responsible for any errors therein and bear all legal liability. The energy efficiency grades of the products sold in the market are consistent with the information of the products stated in this application. In the event that any information provided is false, we shall without objection accept revocation of authorization and any penalty imposed pursuant to the Operational Rules for the Promotion and Use of Fuel-Efficient Tire, as evidenced by this declaration.
